

Optimize Data Center for the Best Option

TestFit's real estate feasibility platform makes it easy to do site planning. Our **real-time AI** with **generative design** optimizes for various types of data centers and cooling technologies with our parameter-driven target power densities and design PUE's.

Infill Development

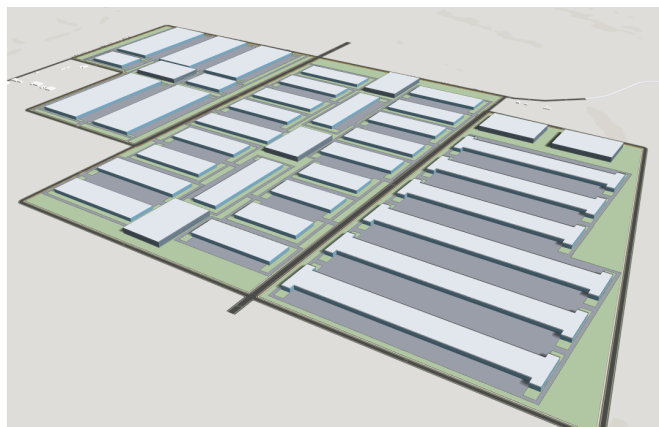

Plan for multi-level data centers with data halls, electrical rooms, admin areas, and mechanical yards.

Account for various types of data centers and cooling technologies with our parameter-driven target power densities and design PUE's.

Campus Centers

Solve massive acreage for campus developments. Divide up your prospective land into phases or zones for various Data Centers types.

Design major roadways and plan for substation layouts all while automatically allocating for maximum buildable area.

Reduce Risk. Increase Potential.
